Aarts Plastics

## New cap for Oriflame by Aarts Plastics

For their new eau de toilette “Eclat Woman” Oriflame Cosmetics developed a complete new packaging. Aarts Plastics was selected for production of moulds and caps. The long term relationship between the two companies has already led to many successful new developments.

The soft, sophisticated, floral fragrance is a subtle expression of understated elegance.

The glass bottle, together with the cap produced by Aarts Plastics underline the perfect balance between classicism and modernity.

The cap has been made of two pieces and is assembled directly in line. The choice of two different materials gives the cap a more heavy weight feel and guarantees a straight surface on the outside. A perfect finish of the cap has been realized by a high gloss gold metallisation.
