Bapco Closures

## Being square has its benefits

Bapco Closures has continued to develop successful closure solutions over the past 10 years. To date it has over 194 patents across 35 countries worldwide. Its unique ability to be open-minded when it comes to shape continues to provide opportunities across the various business sectors.

Having a uniquely space-efficient solution for packaging, helps protect & display a wide variety of products with maximum shelf utilisation. The attractive and convenient protective overcap can help remove unnecessary secondary packaging, reducing waste and cost.

The Bapco closure solutions are readily applied to blown or injected containers as well as thermoformed containers. It is here in the region of thermoformed containers where Bapco Closures have progressed all the required performance testing to assure potential users of the ease of microwaveability of food products.
