Ching Fon

## Revolutionary compact cases, with fold out liner

This new design from Ching Fon has a liner that folds out on an angle of 180 degrees therefore it does not impede the view into the mirror. As a result the consumer does not have to remove the liner completely from the product before application.

These elegant square containers are produced in double walled PMMA giving the appearance of glass to the products.

The compact comes with an easy open press spring button with an optional mirror inside. The PP inner cover also protects the products contained preventing contamination from external effects.

These compacts are fully airtight thanks to the rubber seal which prevents any air affecting the product.

Ching Fon combine a high standard of quality with new technology and extraordinary customer service to supply a stylish and refined selection of containers.

They are a group experienced in researching, developing and manufacturing cosmetic packaging. Ching Fon's products include containers and cases for lipsticks, powders, eyeshadows and blushers as well as plastic jars and bottles for a wide range of health and cosmetic products.
