Ching Fon

Ching Fon's transparent view compacts

Ching Fon knows the importance of colour when choosing a cosmetic make-up, eyeshadow, lipgloss, etc therefore they have developed a compact with a transparent window that allows customers to see the product's real colour and texture. These compacts are suitable for pressed powder or baked material products, like terra cotta.

They have designed two types: one is the basic one and the other has two layers; both of them are circular shaped and available in different size diameters (27mm, 37mm and 59mm).

You can use the two layers compact case in different ways, one suggestion is to use the bottom layer as a box to pack the applicator (brush, sponge, etc) and in the upper one present the pressed powder product.

The combination of these two types with the different wheel's diameters results in 6 different options:

Ref. 7132337-27, size 41.7x19.1mm, wheel diameter 27mm

Ref. 7132337w-27, size 41.7x19.1mm, wheel diameter 27mm

Ref. 7132337-37, size 54.7x21.4mm, wheel diameter 37mm

Ref. 7132337w-37, size 54.7x21.4mm, wheel diameter 37mm

Ref. 7132337-59, size 79.8x21.6mm, wheel diameter 59mm

Ref. 7132337w-59, size 79.8x21.6mm, wheel diameter 59mm

Ching Fon will be attending the Cosmoprof Asia show in Hong Kong, booth 3E-G3A, from the 11th to the 13th of November 2009.
