CPL Packaging

Revolutionary improvements to airless bottles by CPL

CPL Packaging's latest hand-organ airless bottle has resolved the problem common in the regular plug system of the pump going half way up. The inner part of the airless bottle is made up of an organ-pump which is soft enough to bend upwards when the product is dispensed.

These bottles are available in 15ml, 30ml and 40ml with different heights. Following are the specifications:

JBZ-15: 15ML, height: 98mm, diameter: 34mm.

JBZ-30: 30ML, height: 131mm, diameter: 34mm.

JBZ-40: 40ML, height: 151mm, diameter: 34mm.

This new design is set to revolutionise the airless dispensing market- the new inner organ pump design has drastically improved the airless dispensing of products. From the photo you can appreciate the elegance of this new design.
