

Hopf

New cosmetic Trend line by Hopf

The Trend line has a modern design with the appearance of glass and the advantages of plastic. It consists of three jars 5ml, 50ml and 200ml and one bottle 200ml with cap and dispenser.

The jar is made of SAN or PMMA with and without PP insert and the bottle is made of HDPE/LDPE (50/50). The lid is created in two parts, the inner lid is made of PP, the outer lid is made of SAN.

The jars and lids can be customized with colored material, printing, hot foil blocking, metallization and lacquering inner and outer parts.

Hopf produce a very wide range of packaging for the cosmetic, toiletry, pharmaceutical and food industries. They use the best quality raw materials, with top quality moulds, decoration, assembly and packaging.

Supported by careful quality control and carefully scheduled production control to ensure on time deliveries. Mouldings are either produced from customers own tools or from Hopf own stock tooling.

Most important is the marketing function of the packaging that means the creation of a recognizable product of a specific brand name. Economic and technical considerations determine the methods of production, using a variety of raw materials.

High quality moulds, designed and produced in their own workshops ensure continuous high quality of their articles.

Their possession of DIN EN ISO 9001 proves the accuracy of these statements.
