## New City-Line jars by Hopf

These new, elegant and creatively designed City-Line thick walled jars are available with or without a PP insert, in order to further protect your products.

The thick walled jar is made of plastic SAN and comes in 15 and 50ml capacities. The lid is created in two parts, the inner lid is made of PP and the outer lid is made of SAN.

Hopf offer customization options for their jars and lids such as: coloured material, printing, hot foil blocking, metallization and lacquering inner and outer parts.

Hopf have been supplying high quality plastic jars, bottles and caps to the pharmaceutical and cosmetic industries for over 100 years. Hopf not only is a company which produces injection moulded and extrusion blow moulded products, but also a creative team, which combines creative design with the latest technology to fulfill your exact requirements.
