Hopf

Hopf - In Bologna, do it all with elegance

At Cosmoprof Bologna Hopf will be exhibiting two of its latest top-quality cosmetic packaging solutions: the Elegance-Line and its lighter sister the Elegance-Light-Line. Luxury jars to reflect high-class quality products.

The Elegance-Line and Elegance-Light-Line include thick walled jars with capacities of 15, 50 and 200 ml. Both jars and lids are made of SAN with or without insert PP. The Elegance-Light-Line has less material as the original Elegance-Line which gives it a light and fresh touch. The variety of possible decoration methods add to the exquisiteness of these two lines which support silkscreen and hot stamp printing as well as metallization and lacquering. Different models of lids are available for both lines, which allow you to modify the look of the jars to better reflect your ideas of luxury.

Hopf have been supplying a very wide range of packaging to the pharmaceutical and cosmetic industries for over 100 years. Hopf creative and commercial teams are looking forward to welcoming you at their booth to help you find the packaging solutions you need.

Hopf will exhibit at Cosmoprof Bologna from the 2nd to 5th April, Hall 19 - Booth D3.
