Loire Plastic Industrie and Acti Pack

New standard bottle and cap from Acti Pack & Loire Plastic Industrie

Acti Pack & Loire Plastic Industrie are pleased to introduce their new standard Opera PET bottle and their latest user-friendly Alicia flip top cap for the cosmetic and personal care markets.

Joining the already extensive range of Acti Pack PET bottles, the **new Opera bottle** has a capacity of **250ml** and comes with a **clipped neck**. Its dynamic lines ensure great product visibility on the shelf, which can also easily be enhanced by several decoration possibilities such as sleeving and silkscreen printing.

Alicia is Loire Plastic Industrie's brand **new snapped standard cap**. It is a top rounded flip top closure with easy finger access for smooth opening. The double aspect finishing along with its original smile shape increases the visual aspect and friendliness of the overall packaging. The Alicia closure is available with **2mm and 4mm dispensing holes**, making it a perfect solution for shampoo, body cream, refreshing toner, body oil and more.

Acti Pack was founded in 1992 and manufactures Polyethylene Terephthalate (P.E.T) jars and bottles, standard or specific, from 75ml up to 5000ml.

Loire Plastic Industrie, sister company of Acti Pack, was founded in 1968 and is specialised in design and manufacturing injected plastic packaging. Loire Plastic manufactures standard and specific caps, lids and boxes for the cosmetic markets and is able to inject small wall and IML boxes.

Come and discover the **new Acti Pack & Loire Plastic web sites** where you will find their latest news, product innovations and more: www.actipack.eu or www.loireplastic.eu
