Loire Plastic Industrie and Acti Pack

## Damolin Etrechy France has chosen Spoon Cap by Loire Plastic Industrie

Damolin Etrechy (France), French subsidiary of Damolin A/S (Denmark) - one of the leading European suppliers of cat litter - is launching a new deodorant for litters and chose Spoon cap by Loire Plastic.

The Loire Plastic cap has been chosen for its **original design** - a top round shape with a large opening and because it allows an **easy dispensing and use** of the product.

The Spoon cap from Loire Plastic is suitable for **screw neck** with a diameter of . It is also available for clipped or twist off necks. A **tamper-evident facility** is also integrated to the cap.

The Spoon cap can be delivered with or without seal and finds applications in either food or pet markets.

Loire Plastic Industrie was founded in 1968 and has been specialising for 10 years in design and manufacturing injected plastic packaging. Loire Plastic manufactures standard and specific caps, lids and boxes for the cosmetic, food and D.I.Y. markets. Loire Plastic is able to inject small wall and IML boxes.

Since 1942, Damolin A/S has produced cat litter, absorbents for oil and chemicals, powder and granulate products for a number of industrial purposes. The products are produced from natural raw materials with a very high quality. Absorption capacity, comfort and good odour control are qualities which are valued very highly whether the product is non-clumping, clumping or organic.

Acti Pack & Loire Plastic will be present at **Packinnove business meeting** held in **Troyes, France on June 24th-25th**.
