Massmould

Premium Juices Capped With New Massmould Gold Standard

Massmould has designed and produced a new 38mm single piece tamper evident closure to suit Esterform UCS 38 neck finish PET pre-forms.

Manufactured in HDPE, the closure is an addition to Massmould's extensive standard range and has been adopted by Johnson's, the UK's number one freshly squeezed juice brand, produced by Daniels Chilled Foods, to cap fruit juices and smoothies in 250ml, 500ml and 1 litre containers.

The closure has a pleasing external profile and offers efficient and effective tamper evidence for the customer. The Johnson's range has been re-launched in premium format clear PET bottles providing improved visibility of the colour and texture of the product for the consumer.

The closure is available in a range of colours to suit customer requirements.
