PET vials and dropper bottles

These products can be produced in clean room conditions to ensure cleanliness and hygiene. The vials can also be delivered pre-sterilised which eliminates the need for on-site sterilisation.

The high quality vials and dropper bottles are available from 5ml to 100ml in crystal clear PET. They are available in any colour for flexible minimum order quantities of just a single carton.

The vials are complemented by an extensive range of innovative closures, including tamper evident, child resistant, dropper and pipette options.

To enable product differentiation, the closures are all uniquely available in any colour combination for orders of just a single carton.
