Neville and More launch new 20mm Mini Trigger Sprayer

To complement their existing 24mm 410 mini trigger sprayer, Neville and More are launching a brand new 20mm 410 mini trigger sprayer.

The new 20mm mini trigger sprayer has a convenient integral locking clip which rotates to open and close the spraying mechanism and prevent unnecessary spillage.

The 0.25ml output of the 20mm mini trigger matches exactly that of the larger 24mm mini trigger so both triggers can be used as part of a coherent range.

Ideal for a wide range of applications in the personal care, healthcare and household and industrial sectors, the new mini trigger will be held in stock in white, black and natural colours for flexible just-in-time delivery of just a single carton cut to correct dip tube length.

This new dispenser further increases Neville and More's growing range of lotion dispensers, finger sprayers and trigger sprayers, all of which are available direct from stock for just a single carton for enhanced customer service.
