Quadpack

## Airless technology for low-cost applications

The Yonwoo Econo pack is made of polypropylene, a light-weight material with many advantages, including an affordable price tag. PP is also well-known for its excellent product compatibility and, being fully recyclable, is friendly to the environment.

The Yonwoo Econo pack is aimed at low-cost applications of airless technology. These might include sensitive formulae, high-street chemist baby care products or any other product requiring the benefits of an airless pump but without the prohibitive expense.

The Econo pack can be supplied in custom colours and with a wide range of decoration techniques. The pack is also highly suited to labelling, increasing the decoration options and lowering the overall cost further still.

Econo is available from Quadpack in sizes of 15, 30 and 50ml and can be ordered in high volumes. Minimum order quantities apply.
