Rexam Beverage Can - Europe & Asia

**REXAM**

Rexam is the largest beverage can manufacturer in Europe. We have plants in various European locations including Ireland, Russia, Sweden, Spain and Turkey. We also have plants in Egypt, China, South Korea and India. We make both aluminium and steel cans in 18 different sizes – from small stubby cans, through slim models to large pint-size ones, and our new 1 litre can – the largest range of any manufacturer. They are used for a wide array of beverages, including beer, fizzy drinks, juices, sports and energy drinks, water, wine, spirit mixers and even iced coffee. We are committed to continuous operational improvement and have developed a range of technologies to help our customers make their products stand out on the shelves and shape the users' brand experience. These include shaping and embossing, large opening ends, promotional tabs and ends, thermo-sensitive inks and fluting.
