Rainbow of roll-ons by TKPC

New roll-on bottles (15ml and 40ml) and a new powder ball (1.4") have been added to TKPC's roll-on family, perfect for countless external applications of products such as perfume, medicine, deodorant and anti-perspirant.

The new powder ball has a diameter of 1.4" and comes with a special design which enables the application of powder products avoiding the "powder flying effect" additionally you will feel a comfortable massage thanks of the design of the ball.

The TP504 roll-on packaging comes in 40ml, is made in plastic PP and has a new more practical and attractive design to fit with the new 1.4" ball.

The 15ml roll-on bottle fits with a 0.4" roll-on ball, designed specially for applications on small areas.

Taixing K.K. Plastic Co., Ltd., under their brand TKPC, offers a rainbow of roll-on dispensing solutions whereby you can customize either the roll-on bottle or ball size, shape and colour for your specific needs.

They are dedicated to designing, developing and manufacturing various high-quality dispensing solutions, such as lotion pumps, sprayers or roll-on packaging.
