Weatherchem

Weatherchem launches their new 63mm Single-Flap closure

Weatherchem is delighted to introduce the New 63mm Single-Flap Closure. The innovative shape and creative design making it an ideal closure for snacks, nutritional powders or even pet food products.

A leader in innovative packaging, Weatherchem is proud to introduce yet another new convenient dispensing closure. This new Single-Flap Series 63-.400" closure is an extension of the popular Flapper® product line and will be available to order in early 2008.

Weatherchem prides itself on understanding needs that are unmet in the marketplace and this new cap is another example of it. This single-flap style Flapper closure is domed in shape to give a continuation to an ergonomic look of your overall package. The full open pour option is ideal for dispensing anything from snacks to nutritional and pet food products.

This new cap also comes in a directional pour option that provides total control over dispensing of dry creamers and powders. An enhanced thumb indent makes opening their cap an effortless experience—consumers will love how easy it is to use.

At Weatherchem we turn ideas into innovative, convenient, controlled dispensing closures. As the creators of the original Flapper® dispensing closure, we now offer one of the industry's most innovative closure product lines including: Flapper®, FlapMate™, Grinder NR™, LiquiFlapper®, NutraFlapper®, NutraGenII™, and Agricap®.

Whether you are designing or selecting packaging for your new product, or revamping the design of an existing product, 'Weatherchem has the closures that consumers love'.
