

JUMP START YOUR SALES WITH JUMPING POURER

- Product differentiation
- Flow control
- Smooth pouring
- Adaptable to any cap size
- Full solution: cap + pourer

Patented innovative flow solution that gives a perfect pouring experience, clean, smooth and accurate. The pop-up pourer is popping out of the bottle when opening the cap and retract back when closing the cap.

Pop-up pourer springs from the bottle as soon as the cap is removed to reveal a professional-style pourer that delivers a clean, drip-free pour of olive oil. When the cap is screwed back onto the bottle, the pop-up pourer retracts to seal in freshness.

The Jumping Pourer is an insert in the cap. There are no changes to the filling line, and no reduction of filling line speed. Available in all sizes, flow rates and materials
