About Us

History

- 1976 Daesung Industrial Co., Ltd. was established
- 1991 Selected as an Industrial Accident-Reduced Company, Zero Accidents (Dept. of Labor)
- 1995 Changed company name to Apollo Industrial Co., Ltd.
- 1999 Selected as a member of ISO 9001 (From the S.M.I.P Corp.)
- 2008 Green Partnership Business with Aekyung Group
- 2009 Acquisition of ISO 14001 Certification
- 2010 Green up 2010 with Aekyung Group
- 2012 Established industrial R&D research center
- 2013 Acquisition of ISO 22716 Certification (SGS)
- 2015 APOLLO Beauty brand launch
- 2015 Selected as a top company for energy management by Aekyung (AK)
- 2015 Acquisition of Single PPM of the Korea Chamber of Commerce and Industry

“APOLLO – your reliable business partner”

About Us

Since 1976 Apollo has been recognised as South Korea’s leading atmospheric pump and dispenser manufacturer. Constant technical innovation is at the core of our business and is supported by extensive investment in technology and modern production facilities.

Product development is focused on meeting customers’ needs and expectations and is underwritten state-of-the-art technology and by robust ISO 9001 certified quality systems.

Our concern for the environment not only manifests itself in our range of eco-friendly products but also to our manufacturing processes as recognised by ISO14001 accreditation obtained in 2009.

Apollo successfully exports to Japan, Europe and the USA where our high-tech solutions and personalised relationships work in harmony to satisfy an increasingly large international client base.

About Plants

Production Facilities

Mould Workshop

High quality mould design and construction are the core of our business. Our own in-house facilities are equipped with all modern technology such as CNC machining center and lathes and electrical discharge machines that allow us to build rapid prototype molds through full production moulds on site.

Injection Moulding

A full range of modern injection moulding machines from 480 tonne to 15 tonnes allows us to produce a wide range of components using hot and cold runner systems. Automatic raw material supply ensures against contamination.

Assembly

Fully automated assembly systems are complimented by semi-automatic assembly to provide the best combination of economy, speed and flexibility

Quality & Technology

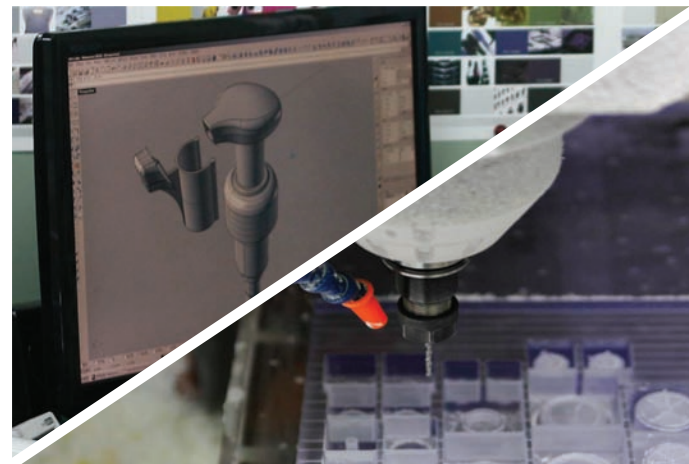

Quality Assurance

Trained quality assurance staff uses state of the art tools to ensure that rigorous quality standards are maintained throughout all production processes

Research & Development

Apollo maintains its technological lead by responding quickly to market needs; our own in-house R&D team is supported by a fully equipped tool shop allowing us to rapidly manufacture prototypes and production moulds.

Customer

For us, the right communication w/ our valued customers is the key to innovate and challenge ourselves for the next step. With long term trust and confidence, we create value for our customers.
