About Us

We are a member of

Groupe
STARD

We operate in accordance with **ISO 9001:2015**

PetRing Sp.z.o.o. is a Polish modern PET packaging manufacturer. Our factory is located in Zielona Góra from where we deliver on a daily basis high-quality bottles, jars, preforms and closures to the furthest corners of Europe and the whole world. Thanks to nearly 30 years of experience in the plastics processing industry, numerous investments in machinery and a professional team, we are able to design, manufacture and deliver in a short time packaging that matches 100% with your product.

Why PetRing is the best choice for your company?

High quality

Short leadtime

MOQ from 10 000 pieces

Competitive price

Custom projects

The best customer service

Deliveries always on time

Professional consulting

Full range of colours

Bottles

In our offer you will find more than 500 models of PET bottles in the most popular shapes and with the most common capacities and threads on the market.

Jars

You can choose from nearly 200 models of PET jars which respond to the trends seen on shop shelves.

Preforms

The high-quality PET and rPET preforms we produce in various colours are ideal for companies with their own blow-moulding machines.

Closures

We offer packaging-matched closures in various colours and types: screw caps, pumps, flip-tops, push-pulls, triggers, atomisers, pipettes, etc.

FILL POINT CAPACITY
from 10 ml up to 10 l

NECK FINISH
from 15 mm up to 145 mm

Our packaging is safe for health and can be used as food packaging. They can also participate in the process of cold pasteurisation of food products using high pressure (HPP).

Satisfied customers are our best advertisement.

4,8 / 5 Average cooperation rating (based on satisfaction survey of a group of 200 PetRing customers from 2024)

4,9 / 5 Customer service

4,7 / 5 Timeliness of orders and deliveries

4,7 / 5 Quality of products

„Excellent customer service! Flawless packaging. Keep it up.“ <Client from Poland>

„We are very satisfied with the quality of the packaging we buy from you. We would like to expand our cooperation.“ <Dealer from Sweden>

„Great packaging in very competitive price. We appreciate your help with customs clearance.“ <Manufacturer of household chemicals from UK>

Packaging that matches with your product.

Thanks to their versatility, durability, affordability and ability to be shaped and coloured in any way desired, PET and rPET bottles and jars are the best packaging for many products:

Looking for customised solutions and/or cost optimisation for plastic or glass packaging? You are in the best hands.

PetRing's strength is its professionals, who will guide you through the process of implementing a new packaging shape from start to finish. With a modern tool room, experienced designers and a flexible approach to each project, we are able to realise even the most out-of-the-box ideas of our customers. We also offer cost optimisation for packaging you already buy from other manufacturers or distributors. How do we do this?

Individual packaging design

Embossing of logos, marks and text

Reduction of the weight of packaging or strengthening it

Selection of optimum neck finish and closure

Colour matching for packaging and closure

If you are looking for truly original packaging, ask us about the special effects available: matt, perl, frozen, multicolour and others.

The process of creating a custom packaging shape

- 01 Your idea and requirements
- 02 Design (technical drawing + 3D design) + quotation for realisation
- 03 3D printing of the packaging
- 04 Closure matching
- 05 Customer approval of the design
- 06 Creation of an injection / blowing mould
- 07 Trial production and colour matching
- 08 Customer approval of test batch
- 09 Order production

Optimalisation process for existing packaging

- 01 Obtaining technical data and packaging samples from the customer
- 02 Identification of client requirements
- 03 Project evaluation and selection of packaging optimisation methods
- 04 Design (technical drawing + 3D design) + quotation for realisation
- 05 3D print of packaging
- 06 Customer approval of design
- 07 Creation of an injection / blowing mould
- 08 Trial production and colour matching
- 09 Approval of test batch by customer
- 10 Production of optimised packaging
