

Innovation, flexibility and choice, that's the Beatson Clark difference

Innovation

With a unique pro-active approach to design, innovation is at the heart of Beatson Clark. An award winning design service with 3D CAD systems delivers new designs for clients in the food, beverage and pharmaceutical markets every year.

An extensive general sale range has also been built up over the years, with containers in a variety of shapes and sizes readily available.

Flexibility

In today's competitive marketplace, clients need a supplier who can be flexible enough to meet the challenges they face. Beatson Clark offer speed to market with a worldwide distribution base, fast tracking on new products and bespoke containers from just 500k units.

Cost effective design solutions such as embossing standard containers are also available, and can be run as part of a standard campaign from quantities as small as 150k units.

Niche products are our speciality and our flexible approach means we are capable of both small and large production runs, depending on the needs of our clients.

Choice

Beatson Clark is the first choice for those looking to the future of packaging. Our policy of continual improvement and investment programs are delivering superior products. These coupled with enhanced recycling and the sustainable credentials of glass make Beatson Clark the environmental choice too.

Several lightweighted products already feature in the general sale range, and with over 250 products to choose from in both white flint and amber, Beatson Clark remains the glass manufacturer of choice.

Why use glass?

Glass is the sustainable and safer choice

- 100% infinitely recyclable & never degenerates
- Made from locally sourced raw materials
- On average containers have 40% recycled content
- Does not contain harmful chemicals such as Bisphenol A or Latex
- Totally inert and keeps the product safe from contamination
- Only packaging material exempt from REACH registration
- Only packaging material to receive GRAS classification from the American FDA
- Amber glass protects the contents from ultra-violet light

BEATSON CLARK 

DELIVERING THE DIFFERENCE

NECK DETAILS

TO 	Twist off or vacuum lug finish - suitable for food products
DTO 	Deep twist off - variation of the twist off
ROPP 	Roll on pilfer proof - tamper evident, suitable for beverages or pharmaceuticals
MTO 	Medium twist off - variation of the twist off
MCA 	Variation of the ROPP, MCA2 and MCA3 variants are suitable for carbonated beverages
R3 	Suitable for general purpose, single start thread, selected sizes can be used with child resistant closure
SPECIAL 	Snap and screw neck

PACK DETAILS

BULK 	Shrink wrapped in bulk
P-PACKS 	Shrink wrapped modular packs

All pallets are heat treated to ISPM15. They are hot brand certified and marked with the IPPC logo. Certain packaging types may not be available on some products. Full packaging specifications available on request.

REGULATIONS/TECHNICAL

CONTAINER DECORATION

We offer pressure sensitive labelling, shrink sleeving and spray coating for the majority of standard glass containers. Information available on request.

ULTRA-VIOLET LIGHT PROTECTION

Beatson Clark amber glass affords protection to the contents from attack by ultra-violet light below a wavelength of approximately 450 Nanometers. This meets the requirements for light transmission in the US and European Pharmacopoeia and the British Standard BS1679 - Containers for Pharmaceutical Dispensing.

All Beatson Clark glass containers are manufactured in accordance with the Materials and Articles in Contact with Food Regulations 2005.

Beatson Clark manufacture 'Soda Lime Silica' glass that conforms to both European and US Pharmacopoeia type III standards for hydrolytic resistance.

Please note: The measurements in this leaflet are intended as a guide only.

Product photograph is for illustration purposes only. Capacity listed is to fill point.

Full specification drawings available on request.

All products are available in white or amber subject to minimum quantities.
