Simple & Sustainable - We Create Infinite Possibilities For You

We clearly understand that our customers are in a beauty industry, what they need is not just a container but a storyteller. A good packaging tells stories.

EPOPACK Co., Ltd. is a leading manufacturer in cosmetics packaging industry. With 30-year experiences in R&D as well as in manufacturing, we offer wide range of high-quality cosmetics containers worldwide. We also provide custom-made services to meet our customers' needs.

Eco-friendly packaging is believed to be presentable for cosmetic products and to be a story teller as well. To achieve the goal, our products are designed with style, easy to customized and made in recyclable material. It happens to be PET heavy wall bottles and jars. Since PET is the most widely recycled plastic in the world, which has been ranked international recycle code number one, and heavy wall style creates the value that you can physically feel in your hands.(Read page 6)

Furthermore, we have been dedicated to developing 100% post consumer recycled (PCR) PET heavy-wall bottles since 2009. PCR PET heavy-wall cosmetic bottles are produced from 100% PCR PET resin by our cooperative partner, DAAI Technology Co., Ltd. The recycled material is created by TZU CHI environmental volunteers, form sorting, removing labels, caps and neck rings one by one as well as thoroughly cleaning the PCR PET bottles. Our PCR PET bottles can be infinitely recycled. (Read page 18)

Additionally, PET heavy wall jars reinforced the idea of eco-friendly . The green idea of “single material packaging” produced a 3 or 4 components all in PET material, which makes recycling process become much easier and more efficient to the consumers. Single material concept reduces the work to recycle the material and also increase the usage for recycled material.

To echo the philosophy of our company: simple & sustainable and uphold the mission to use energy-efficient and highly sustainable packaging materials to develop a wealth of cosmetic bottles, we keep on supplying eco-friendly and recyclable cosmetics packaging.

Our product lines include PET heavy wall bottles, PET heavy wall jars, SAN (AS) , PETG and PP airless bottles.

Founded in 1966, the Tzu Chi Foundation is one of the largest charity organizations originating from Taiwan. There are approximately 5,400 Tzu Chi recycling stations in Taiwan and nearly 2,000 tons of PET bottles are collected and recycled by the over 72,000 Tzu Chi volunteers each year. The volunteers carefully follow the below process to recycled PET bottle one by one.
