TUBES

Standardized Resin Solutions

PE: polyethylene

- Widely applied standard resin for tube production.
- Safe and hygienic, light weight, easy to carry.
- Good sealing performance, effective resistance to deterioration.

PCR & OBP: post-consumer resin

- Material re-generated from bottles, beverage, etc after consumption.
- Available with PP & PE, up to about 80% in total weight with conventional design.
- Food grade certificated by FDA.

Bio-resin: sugarcane plastic

- 100% bio-based PE formed from sugarcane extract.
- Effectively reduce the use of fossil materials, reducing the greenhouse gas emissions throughout the chain.
- Variety of options with different density available, with equivalent performance of petroleum-based PE.

PP: polypropylene

- Single-material concept with both tube and closure in PP.
- Fully verified production process, with up to 30% weight reduction.
- No-sorting needed for recycling after use.

ABL & PBL:

- Traditional polyfoil structure, with good barrier performance.
- Barrier layer available with aluminium, PET and PE materials. 100% plastic structure available.
- Good strength, good flexibility and fine surface printing performance.

Processing Technologies

8c offset printing, 6c screen printing

Digital Printing

Glossy, Matte & Soft-touch Surface Finishing

Reverse Printing

Hot Stamping
