Green protection for your goods

Easypack's packsolo® is an innovative, void-fill packaging system which is designed for long-life performance in any packing environment. This flexible system is available as a standard design or can be configured for bespoke operations, making it ideal for those that require reliable, fast 'in-the-box' packaging.

Manufactured in the UK, packsolo® effortlessly produces lightweight, strong paper cushions that can be easily moulded around any product, providing secure transit for the most delicate items through to industrial goods.

Ultra-strong, green void-fill

The packsolo® system converts rolls of 100% recycled single-ply paper at high speed, creating robust, paper cushions that are up to 80 times the original paper volume.

Total void-fill is not necessary with our innovative system, which reduces costs, waste and frees up valuable warehouse space.

Features

- Converts paper up to 80 times its original volume
- High speed paper conversion
- Quick paper loading system
- Automatic, semi-automatic or foot switch operation
- Adjustable height and output position
- Set exact cushion lengths and quantities
- Easy quick installation
- Choice of paper options

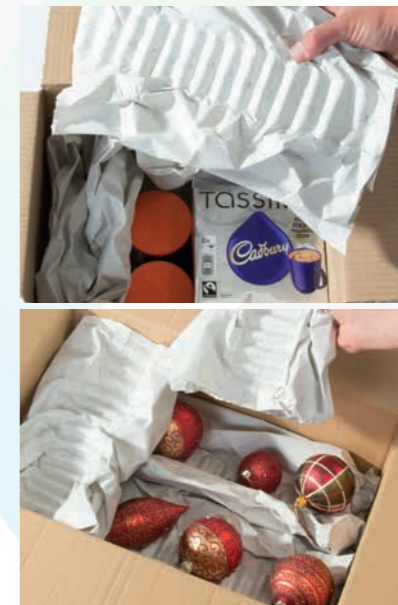

Easy paper loading.

Easy to use control panel.

Our converted paper gives ultra-strong protection.

Sustainable paper cushion void-fill is clean, flexible and lightweight.

Benefits

- 100% recycled, recyclable and biodegradable paper
- Built for long-term reliability
- Convenient on-demand packaging
- Total void-fill not necessary
- Packaging produced at point of use
- Deal direct with the manufacturer
- On-line ordering for next day delivery
- Dedicated account management

“packsolo® is easy to use, convenient and offers a strong, sustainable, void-fill packaging solution”
