

AWYSTONE® - Stones mined in Europe

SELECTION

APRIL 2021

Introductory remarks

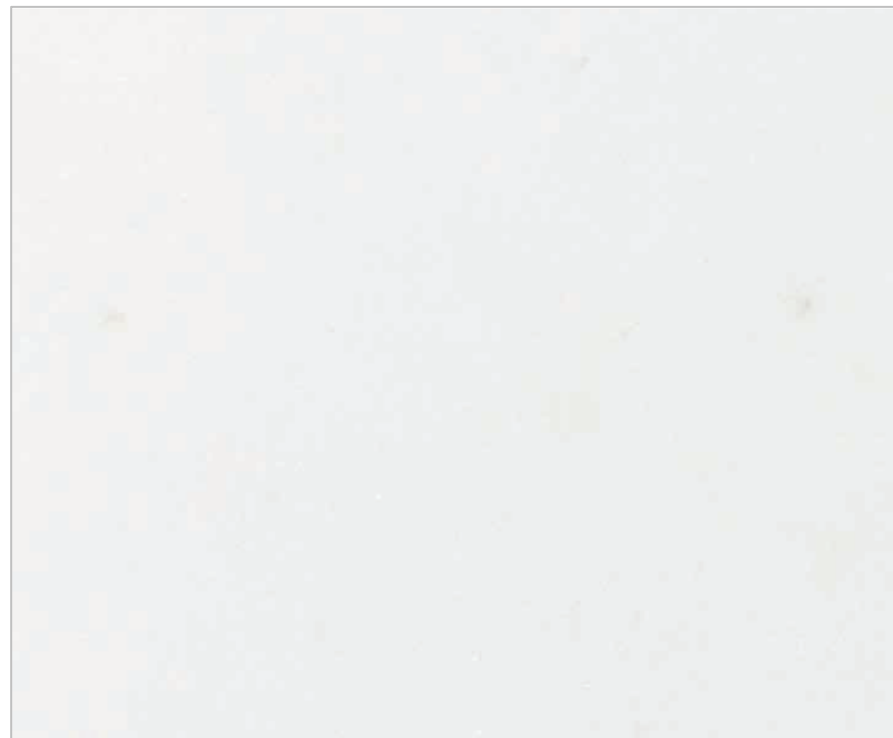

Due to the large variety of stones mined in Europe, this catalog does only cover a sub-set of stones which can be processed by AWANTYS to cosmetic primary packaging. In case you are looking for a particular type of stone or a special color which is not covered in this selection, please do not hesitate to reach out to your AWANTYS key account manager.

Once you have selected the stone you would like to deploy for your packaging, our technical team will check its suitability for your individual design as well as the stone's availability.

For more information on primary packaging made from real stone and reference projects, please [visit our website](#).
