Generic Application Module - GAM/GAM-S

The Generic Application Module - GAM/GAM-S is a carrier module for application-specific tools.

This generic tool module provides a mechanical and electronic interface for custom tools that meet particular application requirements. It offers a convenient basis for integrating such application-based tools as glue dispensers, spreaders, and spray modules.
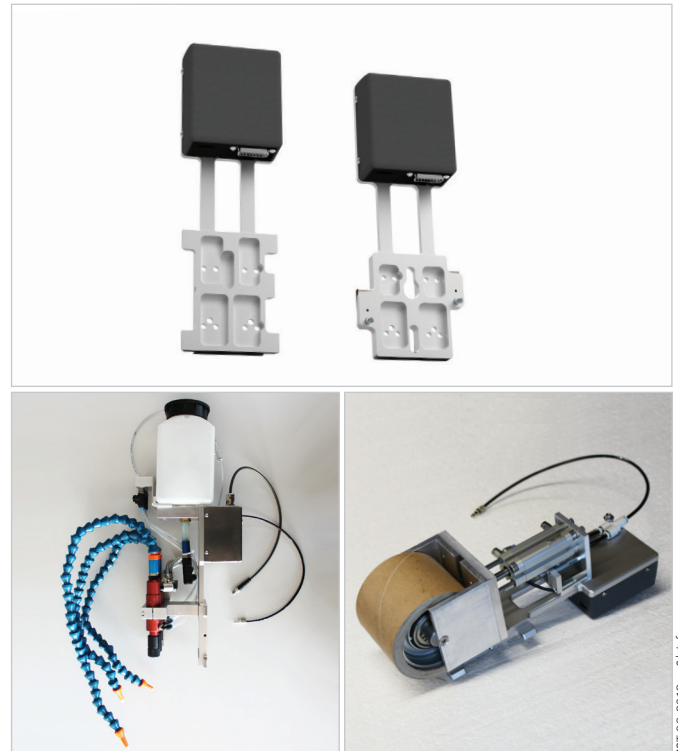

The GAM's electronic interface consists of three 24V digital outputs for tool control. The following functions can be addressed:
- Tool up/down
- Tool activate/deactivate
- Turn on/off additional function

Important:
Please contact Zünd to discuss GAM applications prior to their implementation.

ZST-09-2013-m&k/sfr

Details
3 digital 24V outputs for tool control: • Tool up/down • Tool activate/deactivate • Additional function on/off
Automatic recognition of GAM by cutter.
Load capacity: max. 5 kg / 11 lbs
Compatability: • GAM: **G3** • GAM-S: **S3**

Advantages at a glance
Use of custom tools.
Customer-specific expansion of cutter capabilities.
Fully supported by Zünd Cut Center - ZCC.
