

Universal Module - UM-S

The Universal Module can be used as a universal mount for a wide range of tools.

High speed, stability and proven technology – these qualities are hallmarks of the Universal Module.

The UM-S can be used as a mount for a wide range of Zünd tools, allowing you to adapt the function of the S3 Cutter to meet current requirements.

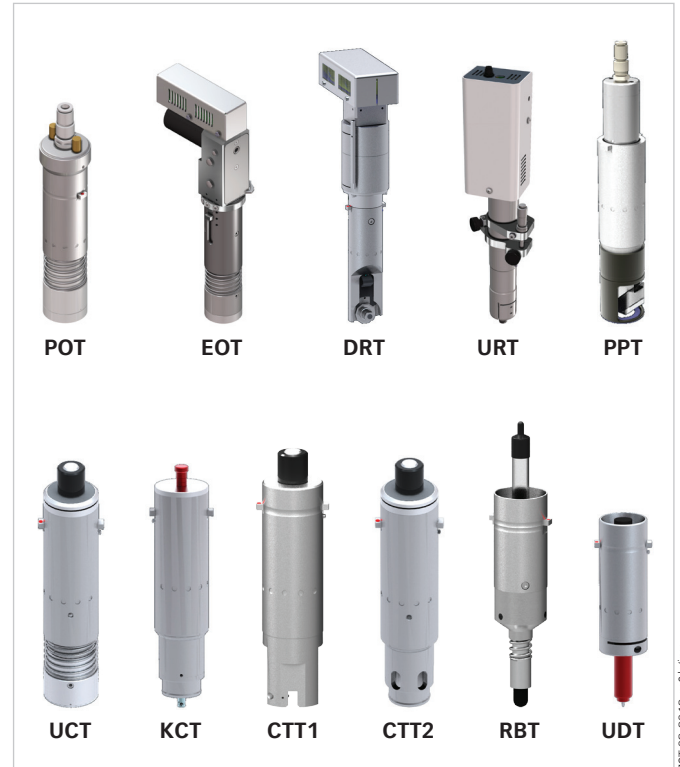

For each application a new tool can be inserted for operation with little handwork.

Other features:

- The bayonet catch enables swift tool changing, with the tool always fixed in the turning centre.
- The module can be operated in print mode

and in position mode.

- A torque support for driven tools is integrated.
- The UM-S can be operated with a glide element to process wavy materials. The glide element is available as an option.

ZS1-03-2012-m&k/jmu

Details

Maximum load: 5 kg.

Stroke: 33 mm (material clearance S3 max. 30 mm).

Tool holder: 40 mm.

Pressure mode: 2-10 kg.

Compatible with **S3**, **L3**.
