## Enroute Pro 4 Zund Edition
EnRoute Software is intuitive CAD/CAM software designed to provide an easy way to create and output files. EnRoute combines a comfortable design interface and simplified output process, resulting in a complete and powerful CAD/CAM solution at an excellent value!

Signmaking – Creative designs are at the heart of any sign business. EnRoute has a full set of artistic yet precise drawing tools that make it easy for you to combine contours, shapes, textures and text into interesting and attractive sign designs. EnRoute's drawing tools are complimented by fast and accurate toolpathing capabilities.

3D Surfacing – EnRoute software offers a variety of tools for creating unique surface effects quickly and easily. Parametric texturing has revolutionized 3D design, enabling signmakers to produce amazing results. Rapid Texture uses the shape of the tool bit to creat a 3D surface effect that cuts amazingly fast on your CNC router. Create and apply a texture in just minutes!

Core Strengths of EnRoute for Sign Making & General Manufacturing

CAD Drawing Tools – EnRoute's drawing tools are straight-forward and easy to use. Creation tools such as the Jigsaw Tool and Vectorizing make it easy to turn ideas into reality.

True Type Fonts - In EnRoute adding and editing text is easy. EnRoute lets you change the font size, type face, or kerning easily. Add text to lines, curves or shapes. Text remains as text and is not converted to an image so changes are simple to make.

3D Surfacing - With Parametric Texturing you are 5 clicks away from adding a vector-based 3D texture that you can resize on the fly and toolpath. Add this to a background and add profits to you business!
Rapid Texturing – Rapid Texture™ offers you offers the advantage that it can create a virtually limitless selection of surfaces while saving you hours of production time. By utilizing the shape of the tool, Rapid Texture™ creates textured surfaces without the use of bitmap images.

Smart Toolpathing – Need to resize once you have set a toolpath? Our Associative Toolpath allows you to do so without redesigning. Easily save strategies and recall settings for the next time you cut.

Nesting Suite – EnRoute offers Automatic True Shape Nesting, QuickFit Nesting and Multiples Nesting. Utilize the Automatic Toolpathing (ATP) for production runs and watch our nesting/toolpathing and ordering algorithms work for you!

Fast and Efficient Vectorizing – Convert bitmap images into vectors in seconds! EnRoute's point editing and other clean up tools will enable you to toolpath and prepare an output file in a matter of minutes.

Output and Verification – Simulating the finished part before output can be easily accomplished by utilizing our Simulate Ortho 3D Rendering feature.

nesting

Powerful, Fast and Effective. Bottom line, these tools will save you time and increase your profits.

EnRoute SOFTWARE

	EnRoute Pro 4 Zund
Drawing Tools (Shapes, Text, Offsets)	x
Editing Tools (Weld, Fillet, Point Edit, Cleanup, Trim/Extend, JigSaw, Cut By Line)	x
Design Tools (Snaps, Move, Scale, Rotate, Dimension, Measure, Layers, MultiCopy, Mirror, Align)	x
Toolpathing 2D (Routing Offset, Island/Hatch Fill, Engrave, Drills, Slots, Open Contour Offset)	x
Toolpathing Options (Inlay, Channel Tag, Bridges, Final Pass)	x
Toolpathing 2.5D (3D Engrave, 3D Clean Pass for Routing Offset & Hatch/Island Fill, Pyramid Tool)	x
Toolpathing 3D (Apply Toolpath to 3D Relief, Carve into Surface)	x
Simulation of Toolpath (2D Simulation, Ortho View, Can Set Output Order from Any Simulation)	x
Rapid Textrue	x
Rapid Picture	x
3D Rendered Simulation	x
Output (Hundreds of Machine Drivers Included)	x
Saved Templates (Toolpaths, Plate, Material Library, Tool Library)	x
3D Relief Creation (Rounded, Beveled, Flat)	x
3D Editing Tools (Revolve, Spin, Extrude, Sweep Two Rails, Chamfer, Apply Mesh, Apply Bitmap, Slices, Align, Combine Reliefs, Merge Reliefs)	x
3D Parametric Texturing	x
3D Relief Editing Tools	x
Nesting (True Shape Nesting, Dynamic Nesting, Copy-Nesting)	x
Strategies	x
20 Import Filters	x

Included in the Enroute Pro 4 Zund Edition

|	
Enroute Pro 4 - Zund Edition	**$6,495**
Includes all the features listed	
Enroute Pro 4 - Online Setup & Training	**$1,200**
2hrs online install & configure	
2hrs online initial introduction	
2x 2hrs online follow up training	
Basic training DVD	
Pro 3D surfacing training DVD	
Fonts & vector clip art DVD	no charge
Total package	**$7,795**

Learning to Use EnRoute is EASY!

Training DVDs offer in-depth lessons on topics geared towards real-world situations and engaging video demonstration, allowing you to choose which lessons to learn, when you want to learn them. The Basic DVD covers the fundamentals of design, toolpath and output, while the Pro DVD shows you how to use the advanced 3D surfacing features.

Online Setup & Training - Eight hours of personalized training, scheduled at your convenience in 2 hour segments, ensures your EnRoute Software installation and start-up will go smoothly. An EnRoute application expert will answer your application questions via online teleconference and teach you the skills you need for your specific project or application.
