

Tool shop

Since 1976 SIBO G has specialised in the production of high precision molds for the plastic packaging industry as well as for demanding technical components for the auto and E&S industry.

The Tool Shop is today equipped with high technology machines from MIKRON, AGIE, OKUMA and HSC, with which we can perform the most demanding milling, drilling, grinding and erosion processes.

There are 44 specialists in our tool shop who take care of the excellent maintenance of the molds as well as for our constant innovations.

We offer a complete service from the initial idea to the final product:

- Idea and concept of the product
- 3D construction and 2D technical documentation
- Possibility of producing a pilot mold
- Producing a multicavity mold
- Sampling and validation of the product

We assure the support from our engineers and technical staff throughout the whole process of our service and with your close co-operation we can find the best solution for you.

Molds for pharmacy and medicine

With many years of experience we produce multicavity molds for the plastic packaging industry and high precision molds for medicine, both of which can also be used in class 8 clean room.

Molds for technical components

Many well-established customers who have been working with us for many years, order tailored molds for demanding technical components for the auto and E&S industry, which can also be used in class 8 clean room.
