## **Sequence, Inc. Partners with Adents to Provide Scalable Serialization & Aggregation Software Solution**

*Princeton, NJ* – **Sequence, Inc.** a leader in providing full-service quality and compliance services to the pharmaceutical, biotech, medical device, tobacco and other regulated industries, has partnered with **Adents**, a leading provider of versatile serialization and aggregation software products, to offer its customers a scalable track & trace solution.

The Adents serialization and aggregation suite of software enables companies to achieve traceability and documentation compliance easily, addressing both current and emerging regulations while also minimizing impact on production processes and productivity. An ideal “standardized software” approach, Adents unit identification and traceability software is extremely flexible, scalable, and quick to deploy as it does not require add-on hardware. It also helps enrich marketing and eliminate counterfeiting.

Sequence has expanded from its roots in validation to emerge as a leader in comprehensive quality and compliance consulting for regulated industries nationwide.

“We are confident that our customers will be extremely pleased with the Adents cutting-edge serialization and product traceability solution,” said Daniel Santarsiero, VP of Business Development for Sequence, Inc. “We look forward to offering this easily upgraded product in response to customer requests for assistance in meeting the 2017 DSCSA serialization deadline that is fast approaching.”

James Cummings, VP Americas for Adents, said: "We welcome Sequence as a partner, and anticipate complete satisfaction of their customers with the way our serialization software product will allow them to achieve compliance and build a foundation for seamless global traceability in the future."

### **About Adents**

Adents is a software specialist that develops unique product identification and traceability solutions, helping pharmaceutical manufacturers and contract packagers adapt to market changes and comply with serialization regulations. Adents Pharma Suite utilizes user-friendly, standardized software compatible with both information systems (ERP, MES) and existing production and packaging equipment. Easily upgradable, the software is designed to address both current and emerging regulations to help pharma companies remain in compliance long-term. Adents Pharma Suite serialization software was recently awarded an Innovation Award from Medicine Maker, a UK-based publication focusing on the pharmaceutical manufacturing sector.

Founded in 2007, Adents operates in the United States, Canada and Europe. For more information, visit [www.adents.com](http://www.adents.com).
