## BeRemarkable

Welcome to Raepak, a company devoted to innovation and the supply of liquid packaging for clients around the world.

We would like to introduce our new 1000 units MOQ product range. These products have been hand picked, with an aim to help brands launch new product ranges. The low MOQ collection makes it affordable and a low risk option.

These airless, acrylic and double wall containers look stylish and modern. You can also choose from our exciting range of dual chamber bottles. These containers have single or double dispensing capabilities.

# Dual Bottles

Do you want to create a cosmetic product that offers a body lotion, face cream or hand lotion; all in one bottle? The dual chambers built in these containers offer this solution. You can also use a single or double dispensing pump, allowing for extra consumer control.

Call us today for a sample, or visit [www.raepak.com](http://www.raepak.com) to view our stock and non-stock products Online.

AL-18-15d:	Capacity:	15ml (7.5ml x2)	30ml (15ml x2)
	Height:	78mm	147mm
	Diameter:	53mm x 28mm	
	Dose:	0.46ml	
	Type:	PP Airless Bottle	
	MOQ:	1000	

## AIRLESS BENEFITS

1. Protection from excessive exposure to air provides your liquid product with a longer shelf life
2. The vacuum dispensing effect, draws up a disc and dispenses the product out of the bottle. This creates less liquid wastage
3. A higher quality packaging solution
4. Single and Dual airless bottles allow for different types of cosmetic solutions in one container
5. The liquid contents are dispensed via a metal free path removing the risk of oxidization
6. Supports the use of less or no chemical preservatives, beneficial for organic and natural products
7. Airless containers can dispense equally well on their side or upside down due to the vacuum dispensing system
8. Able to dispense products that are more viscous, compared to traditional dispensing pumps.
