ready-to-go container solutions

concept to conclusion

contents

why Nekem?

- We have a wealth of experience in meeting the needs of the pharmaceutical, healthcare and cosmetics markets with high quality glass containers and associated products.
- We are specialists in glass containers and packaging - every solution we provide starts with a thorough understanding of your needs and the challenges you face.
- We combine an extensive and diverse product range with knowledgeable advice across a whole range of packaging issues.
- We hold extensive stocks of standard bottles, jars, closures, droppers and other accessories ready for immediate despatch nationwide.
- We can offer you a free sample service - this has proved invaluable in ensuring the success of many of our customers' projects.
- You can have total confidence in our products and services - as an ISO9002 accredited business, rigorous quality assurance regimes and traceable procedures accompany every single order we handle, from enquiry to delivery.

stock

We endeavour to hold stock of all the containers and accessories featured in this brochure, ready for immediate despatch. In the unlikely event of a particular item not being in stock, we can place a priority order for you.

delivery

Small orders are normally delivered within two working days and palletised orders within four days.

carriage

Orders over £100 nett are delivered free of charge. For orders under £100 carriage is £10. For orders under 15 cases a minimum packing charge of £4 should be applied (0.75 per case) whichever is greater.

ordering

We are happy to accept orders verbally or by post. Simply call us on 01482 223424 to place your order or to request a supply of pre-paid envelopes. We can supply large or small orders - but only full cases. If required, we are able to split cases of closures as necessary.

design & finishes

For larger quantities, Nekem can offer a bespoke design service on selected bottle ranges. This can embrace a wide range of decoration and printing techniques, as well as container shape and colour. A colour matching service on closures is also available.

plastic

Nekem also stocks a wide range of plastic containers in HDPE, PVC and PET along with an extensive range of accessories. A fluorination service is also available. Please ask us for details.

sizes

Dimensions are given in millimetres, volumes in millilitres and weights in grammes. These figures are approximate. If you require more precise information, detailed drawings can be supplied.

We are able to provide the ideal glass container for the vast majority of our customers from our comprehensive 'off the shelf' range. However, if you are looking for something special, we can work with you to develop a highly individual packaging solution. Our bespoke design service brings together all of our skills, knowledge and experience through every phase of a carefully planned process.

customer brief

Gaining an in-depth understanding of the customer's product and their needs is the essential starting point of every project we undertake. We will hold detailed discussions with you about the product to be packaged, potential markets, estimated quantities, and time scales. Together we can explore the container options in terms of size, shape, colour, finish and printing. We can also advise you on the best type of closure.

presentation

Working with all the information collated at the briefing, we can then prepare a packaging concept and estimated costs. These will then be presented to you for your approval.

product development

Once the project specification has been agreed we will then

proceed with product drawings and any tooling, etching and spraying that may be required. Pilot samples will be produced for your approval and will undergo rigorous testing. On completion of the testing programme, full production can then get underway with delivery of the finished product by the agreed date.

For further information about our bespoke services call: 01482 223424
