RARI-CANS AND -PAILS ■

Article: Lever lid cans and pails out of tinplate with rimless ring (RaRi)

Sealing:

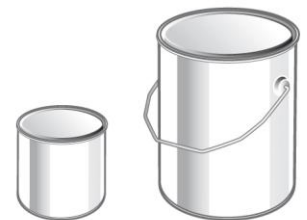

- welded side seam
- ring and bottom sealed

Inside lacquer coating:

- for solvent-based contents **without** inside lacquer coating
- for water-based contents (ACL) bottom, body and ring **with** inside lacquer coating lid inside film laminated

Carrying device:

- Cans: without carrying device
- Pails: wire bail with ball ears

Our RaRi-cans and -pails are the best available containers for wood preserving varnishes and gels. Due to the rimless ring they allow the product to be stirred easily. The 5 liter RaRi-pail is conical and can therefore be stacked inside one another when empty and on top of one another when full.

You can select the container's finish, e.g. inside lacquer coating and high quality printing to meet your specific requirements.

Nominal capacity liter	Ø mm	Height mm	Contents		Carrying device		Design type approval
			solvent-based	water-based	without	wire bail	
5	185/173	229	■	■		■
