 - layable wire handle
- Body form:**
 - with beads
 - body at the bottom drawn in and therefore stackable
- Closures:**
 - MC = tin screw top
 - PC = plastic closure
- Please note:** partially flat top drums are also available with opening for optimal drainage closures (REL)

Flat-top drums from 5 to 30 litres are exceptionally high-strength round containers that satisfy the strictest transportation requirements in all modes of transport. They are suited for a variety of chemical goods as well as for cooking oils or other foods.

Numerous types of closure make it easy for your customers to use your products properly. Flat top drums are closed using mainly different types of plastic closures. The containers have a carrying device and can be stacked on top of one another.
