Innovative Clamshell packaging for retail

Surecel[✓]

Developed for all aspects of the retail market

The Surecel range has been developed with presentation in mind offering clean stylish designs along with the highest level of security possible for a hand assembled pack. The patented closure system is quick and easy to close yet extremely difficult to open, offering excellent tamper evidence.

Crumple free product cavities are unique to Surecel and ensure that your products arrive at the point of sale the way you intended.

Highly tamper evident security: Surecel Clips are very secure and double side walls make it extremely difficult to get into the pack and pull apart.

Sides of the pack are more secure and won't gape under pressure. This is much better for transport as packs can fall apart under compression from being badly handled in transit.

Surecel packs are the first RPET packs which can be reliably welded using hand held ultrasonic pliers.

The hanging slot can be placed above the plinth or within the plinth

Surecel clips are incredibly quick to close yet cannot be opened by hand

Easy to customise

The *Surecel* [✓] formula for the perfect pack

Choose your plinth from the range of sizes overleaf

+

Customise the front and/or rear plinths to your product shape

+

Add printed insert

= high visibility,
cost effective packaging
