

BERGAMI

COMPANY PROFILE

Our Product line includes:

- **TUBE FILLERS** with single and double channel, complete with closure systems for all type of tubes.
- Vertical and horizontal **CARTONERS** for low, medium and high speed applications.
- Wrap-Around **TRAY-PACKERS** with robotized product feeders
- **OVERWRAPPING** and **BUNDLING** machines, for low, medium and high speed applications.
- Automatic **CASE-PACKERS**, both in Top loading and Side loading configuration.
- **PALLETIZING SYSTEMS**,
- **COMPLETE PACKAGING LINES**, customer's tailored, easily able to integrate new or existing equipment from other manufacturers.

The packaging industry is indeed one in continuous evolution and to remain competitive we have to constantly deal with technological innovatio

HISTORY

Bergami S.r.l. founded in 1982 is located in Altedo, just outside of Bologna known worldwide as the "packaging valley". Since beginning we have been specializing in the manufacturing of packaging machinery, focusing on the cosmetic, pharmaceutical, food and non-food industries. In the early '90's, in response to the market demand, we developed the design of our cartoners, wrappers and case packers to conform to GMP STANDARDS. All of our machines also offer a small foot print and balcony construction. But more importantly all of our machines are designed to achieve an easier change over function, which can be carried out by line operators. During those years in the developmental stages, a team of engineers able to follow the design and realization of complete packaging lines, along with the ability to support the customer along the hard phases of the plant start-ups developed. Thanks to the experience accumulated over the years, our company has created a wide range of machines in order to meet and resolve the various market demands, never sacrificing high quality, safe, reliable, packaging machines and services.

OUR MISSION

- Bergami is committed to producing packaging machines that include exclusive features with regards to caliber and innovative design. Along with easy cleaning and rapid changeover ability
- Construction is in accordance with FDA-UE and GMP guidelines. And in addition offer a compact footprint and high quality components
- We market our products through internationally located subsidiaries and a network of agents, representatives and support offices
- Operations are managed by local knowledge-based workforces that are customer-focused and are better able to understand their markets and culture
- Bergami offers quick and reliable technical assistance
- We are devoted to helping the packaging machinery industry become more productive
- We strive to meet the ever growing challenges of a competitive global marketplace
- These choices follow the philosophy of "Total Customer Service" that BERGAMI has adopted, thanks to which we have already obtained many targets
- Customers all over the world appreciate the high quality of our machine program. BERGAMI machines convince on account of their precision, outstanding performance and economical life-cycle costs. Individual service, customized engineering and tailor-made turn-key solutions demonstrate the advantage of our technology.

BERGAMI

COMPANY PROFILE

As an internationally active, innovative, forward thinking company, in a constantly changing market, we provide reliable packaging solutions. Bergami is a company that combines state-of-the-art technology and services to meet the challenges of the market, our customers. We provide innovative, application/user-oriented technology and combine it with superior service and reliability. Customer satisfaction and benefits along with close working relationships with our customers are just a few ways Bergami develops packaging systems that guarantee top performance and ensure long-term customer satisfaction. With an export share of sales at currently over 90%, Bergami systems are known throughout the world for their high technical standards, quality and reliability. We have more than 1,000 machines and lines installed throughout the world for packaging of products in the cosmetic, pharmaceutical, food and non-food Industries.

We are different – in culture, technology and the way we do business

Inspired by technology

Innovation is our core strength. Therefore, through modern technology, unrivalled performance and ergonomic features, our machines help you to pack your products globally in a more efficient and easier way

Easy to deal with

We understand your expectations, know your demands and speak your language. Our team will guide you through your entire project, with rapid reaction times, quick decisions and unmatched solutions.

Passion for Packaging Machinery

Each machine meets our and the customers' expectations for superior quality, unique design and excellent performance.

Powered by partnership and networking

We develop long-term partnerships, built on honesty and reliability. Together, we generate tailor-made solutions for your packaging requirements.

Meeting your desire

Each Bergami machine is unique, designed to meet your needs, we create the packing machine you want!
