

CARD ON VACUUM FORMED TRAY

A new unique alternative to showcase your medical devices and promote your starter kits. It is available as a two piece set OR as a one piece hinged package.

The vac tray can be produced with Clear PET, basic HIPS or Pharma Grade PVC. Your message can be printed on all sides of the carton tray and will allow you to place fully detailed instructions within the COV without the extra expense of a booklet or leaflet.

COV is completely scalable & customizable to meet your specific requirements. Our design team would be happy to design a COV specifically adapted to your needs.

**Reduce cost
for hinged boxes**

**Explore unlimited
application
possibilities**

BELLWYCK INNOVATIVE SOLUTIONS™ - CARD ON VACUUM FORMED TRAY

FEATURES

- Eliminate the need for a set base structure
- Use it with a rigid lid
- Use it with or without laminated windows
- Use it with clear or tinted PET vacuum tray, and let your artwork show through
- Create 2D effect once box is opened
- C.O.V. is also available as a telescopic 2-piece set

ADVANTAGES

- Come assembled
- Hinging allows fast and cost effective fulfillment
- By eliminating the set base which is attached to a hinging card, save on your packaging costs

BENEFITS

- C.O.V. can be shipped to you already assembled or with the lid flat
- Simplex style lid has built in unique locking features enabling you to join it with the hinging card

A leader in North American premium, healthcare and clinical packaging, BELLWYCK thrives in innovating and consulting on a variety of solutions and available alternatives. Contact us by phone or email sales@bellwyck.com for more information about this innovation or your potential project.

Delivering Value. Every Day!
