## LIPSTICK TUBE

- An intuitive tube packaging solution with a twist mechanism that is easy to control the dose to apply without any waste.
- Different applicator options: flocking sponge, soft tip, flocking tip and roller ball.
- A perfect combination of applicator, formula and tube packaging. Suitable for on-the-go consumers.
- Good for color makeup, lip gloss, shimmer, eye shadow, concealer and so on.

## REPLACEABLE FLOCKING SPONGE TIP TUBE

- Replaceable applicator: no need to worry about the deformation and contamination of sponge applicator after using the cosmetic product for a while.
- Two version: With spring (Automatic on/off patent design valve system) or Without the spring (Manually open and close the valve system)
- No Pintle Design on Cap: Avoid sponge damage.
- Two material options: NBR sponge or Flocking PU sponge

## DELTA TUBE

- The world's first triangular prism tube with an eye-catching lipstick-similar shape.
- Triangular head can also be injected into different colors to match the lip gloss.
- Delta tube offers the brands a stunning packaging solution by the unusual visual experience.
- A transparent cap allows the consumer to see the lip gloss color directly.
