

They Asked.

We Delivered.

“We want a structure that has foil properties, improved aesthetics, and costs less...”

The innovative team at APC responded with a high barrier foil alternative structure that met all of the customer's requirements.

ADVANTAGES OF METALIZED LAMINATIONS

- * Reduces cost
- * Increases puncture resistance
- * Improves shelf appeal by eliminating foil's shop worn appearance
- * Eliminates flex cracking for improved long-term product protection
- * Shelf life studies reveal superb results with metalized films versus foils
- * High Barrier MET PET exhibits foil-like barrier properties (MVTR < 0.01)

For over 100 Years, APC has partnered with our customers to design, develop, and implement innovative solutions for their packaging needs. Visit us online at: www.ampkcorp.com

Rotogravure * Flexographic * Extrusion Laminating * Preformed Products
