MARU Airless _ style

30 ml, 50 ml, 100 ml EBM Airless Bottles

Styled up as the classic cylindrical shape, MARU Airless is a collection of 30 ml, 50 ml, and 100 ml EBM Airless Bottles.

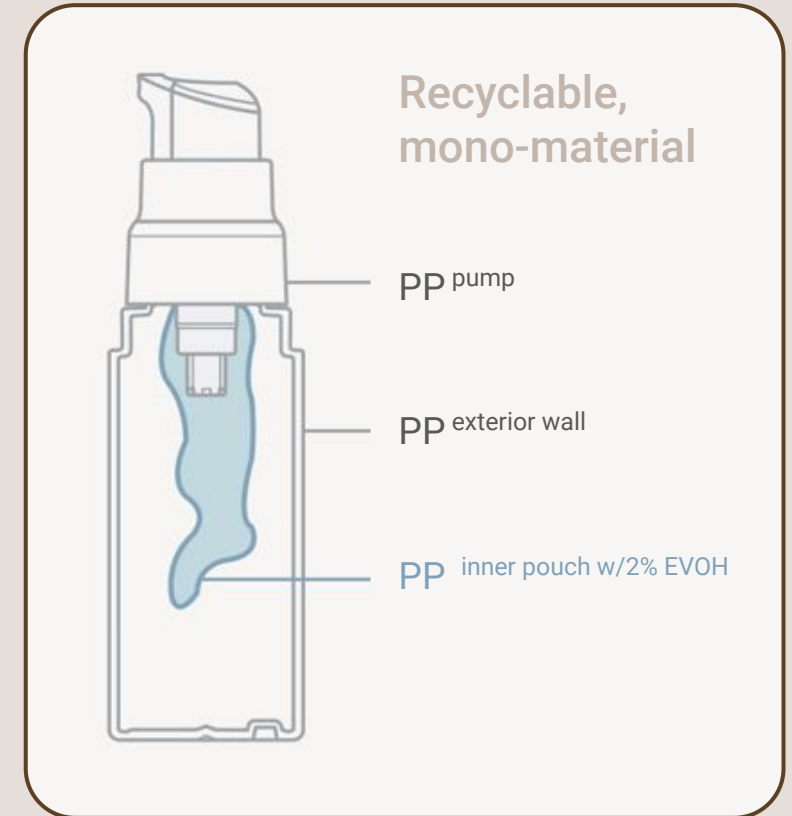

In line with its later EBM airless siblings up to 500 ml, MARU Airless marks the most opted-for skincare packaging that maintains natural and organic ingredients in fresh.

_ sustainable and reliable

The secret behind its light, compatible, and stable protection is the PP airless pouch of excellent compatibility and chemical resistance inside a rigid bottle.

Not only is it recyclable, but its plastic usage is 70% less than conventional piston-type airless bottles.

Leaving nearly nothing after usage, MARU Airless guards product quality while providing brands options to formulate products without preservatives.

- * Reliable mechanism
- * Recyclable airless design
- * Reduce 70% plastic usage
- * Recycled plastic (PCR)

_embracing diversity in beauty routine

A pump or a sprayer, MARU Airless works well with viscosity variations.

It does not need a dip tube. MARU Airless enables users a 360° upside-down usage.

Adding decoration customization, MARU Airless can be the next champion product line-up.

- * Works for all viscosity variations
- * Upside-down usage
- * Output 0.2 ml
