# What are Airless Shuttles?

**Airless Shuttles** are the multi-cartridge airless concept by SR Packaging, designed and manufactured in Taiwan.

2 in one, 3 in one, or 4 in one, each serves for the rise of personalized beauty trends of customizable possibilities.

Each PCR airless cartridge uses 70% plastic less than the conventional piston-type airless bottles.

- ✓ ECO-friendly EBM Airless for Clean Beauty
- ✓ Chemical compatibility
- ✓ For all viscosity variations

airless sprayer +

Skin-friendly, organic ingredients are good food sources for bacteria. Without preservatives, the natural-based content might fail consumer expectations.

**Airless** is the solution, a sprayer for the mist products, and a pump for lotion, oil, or balm.

Targeting a safer product commitment and extending commodity shelf life, the Airless Shuttle offers two ways of dispensing for wider variations.

- Scalp massaging oil + Tangle free shampoo + Repair hair mask + Natural hair styling gel Hair care

**best  
4  
you**

## Fill, Use, and Recycle the airless cartridges

### Fill >

Contract manufacturers fill the cartridges over the pump engine.

### ^ Use

Consumers use the product via the matching airless pumps & sprayers.

As the pressure sets in, this inner pouch contracts and separates evenly from the exterior bottle wall.

### ^ Recycle

It leaves nearly nothing behind after usage.

Consumers discard the emptied cartridges into recycle bin.

Assemble Airless Shuttles.

Before assembling, fill the cartridges over the pump engine.

- ① Take 1 pump and 1 cartridge.
- ② **PUSH, CLICK, LOCKed**

The closure is an airtight lock that requires a hard push. With a click sound, a securely locked airless product is ready.

Repeat ① & ② to assemble rest of the pumps and cartridges.

- ③ Slide a cartridge into a case by the locator point at the bottom of the case.
- ④ Slide rest of cartridges into the case.
- ⑤ Close the overcap,

**Airless Shuttles** are now  
ready to be launched.

## About SR Packaging

Started in 2003, SR Packaging companies manufacture airless bottles, jars, dispensing solutions, and tubes using post-consumer recycled plastics and biomass plastics to help skincare, personal care, beauty, and cosmetic brands build measurable success in line with consumer demands.

With R&D labs, production facilities, and sales offices across Taiwan, China, Japan, and the United States, SR Packaging companies provide immediate support targeting sustainable goals.
