

Sugarcane Tubes made in AMERICA

Respond to potential tariff hikes.

Benefit from time-saving production.

Reduce shipping costs.

Choose sustainable, recyclable sugarcane tubes.

SR Packaging North America Inc. (SRPNA) provides beauty tubes made of sugarcane green PE (biomass plastic) from its production house in Allentown, PA, to help companies respond to potential tariff hikes, reduce shipping costs, and benefit from time-saving productions.

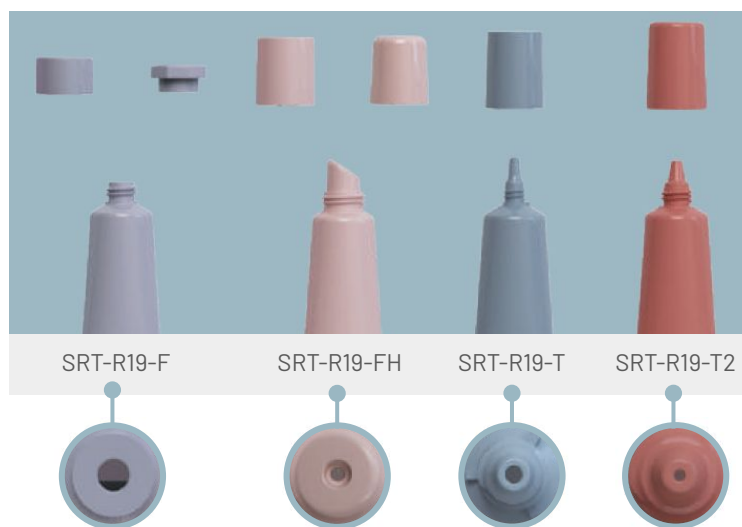

SRPNA tube services satisfy North American market demands with a shorter lead time and swift delivery without worrying about potential tariff increases. It uses renewable bio-PE to define its American-made beauty tubes as recyclable sugarcane tubes in line with global sustainable developments.

Benefits of using sugarcane tubes

- * Reduce CO2 emissions
- * Recyclable
- * High versatility
- * Utilization of plant resources
- * Increase brand value

From lip balm, lip gloss, makeup foundation, concealer, and hand cream, to mini skincare travel sets, the tubes can be customized according to the needs to achieve the desired finish:

- ✓ 3/4 inch tubes (Dia. 19 mm)
- ✓ 0.2 fl oz ~ 0.7 fl oz (6ml ~ 20ml)
- ✓ 4 thread types with 6 closure options
- ✓ Color-matching
- ✓ Gloss or matte finish
- ✓ Silk screen printing (up to 3 colors)
- ✓ Hot stamping
