**KaramMD Skin Trifecta, the 3-Step Complete Anti-Aging Routine has refillable EBM AIRLESS bottles and a tube for packaging.**

KaramMD Skin, by Dr. Amir Karam, developed the **3-Step Complete Anti-Aging Routine, Trifecta**, that is formulated with only the best high-quality ingredients to deliver results that get better over time. It starts with **Rinse** for cleansing, then continues with **Quench**, and to complete **Illuminate**. It brings visible results in as little as 4 weeks following its twice-daily treatment.

Each step contains high-quality ingredients perfectly balanced and layered in a specific way for maximum efficacy. Therefore, the selection of packaging can not be just about impressive presentations. It has to protect the powerful ingredients without impacting product stability.

Hence, KaramMD Skin contacted SR Packaging for suggestions and opted for the tube & EBM AIRLESS for the 3-step anti-aging routine.

Step 1

**Rinse, Daily Cleanser** is an award-winning, non-foaming cleanser designed to maintain the skin's natural balance.

**2.5 fl oz | 75 mL** 5-layered black Dia. 35 tube + matte coating & white silk screen printing.

Step 2

**Quench, Vitamin C Serum** is an antioxidant-packed formula featuring three stable forms of Vitamin C—brightens and revitalizes.

**1 fl oz | 30 mL** Refillable EBM AIRLESS case in black + matte coating & white silk screen printing.

Step 3

**Illuminate, Anti-Aging Cream** is an all-in-one formula with slow-release retinol and 20+ targeted actives designed to treat even the most sensitive skin.

**1.7 fl oz | 50 mL** Refillable EBM AIRLESS case in black + matte coating & white silk screen printing.

\* Tube: chemically compatible 5-layered plastic laminated tube with a flip-top cap for effortless one-hand usage.

\* Refillable EBM AIRLESS: impact-resistant bag-in-bottle airless cartridge inside a reusable dispensing case to prevent active ingredients from oxidation and contamination.
