

EBM AIRLESS **GRANDE**

The latest EBM AIRLESS GRANDE is a "super-sized" airless bottle that gives options to formulate products without preservatives or additives.

OFC 524 ml, weighs only 40 g (the weight of a non-airless PET bottle weighs around 20 - 34 g) and matches with sprayers and pumps for products of various viscosity, EBM AIRLESS GRANDE helps beauty brands to transform and present sustainable, organic skincare for all consumers.

Each EBM (extrusion blow molding) airless bottle has an antioxidant inner pouch that prevents contents from contact with air and maintains freshness. It also reduces 70% plastic usage and increases 30% filling capacity compared to conventional piston-type airless.

Check more EBM AIRLESS options on [SR Packaging Catalog](#).
