

HANG IN THERE

new PE bottle for easy-carry skincare solutions

For hand cream, sunscreen, or lotion, **HANG IN THERE**, the new PE bottle is an extraordinary design for easy-carry skincare solutions.

On top of its double-wall cap is a ring for a chain that turns itself into an accessory hanging on handbags or backpacks.

It benefits users by allowing them to access their skincare products anytime. Without having to open handbags and then look for the thing in need, **HANG IN THERE** saves trouble and offers users convenient usage for their travel.

- **Customization in freestyle**

The ring part has two separate plugs made of MBS plastic and can be made into different colors to make the entire look standout.

- **Squeezable PE bottle**

Impact-proof, durable, chemical resistant, and compatible with numerous skincare formulations. The PE bottle is also squeezable. A PE plug assembled with the PE bottle enables users to use the product under control.
