Cooper

Best value spray actuator in the market

Cooper

Best value spray actuator in the market

Choosing for Cooper is choosing for a hip and trendy product. This one-piece spray actuator has proven to be suitable for Personal Care applications. It complements the aerosol package that can be further customised with different over caps.

Thanks to Plasticum's **Integrated Spray technology** Cooper gives an excellent spray performance with a uniform spray pattern. The optimised ergonomics and embossed grip contribute to a convenient usage. The favourable cost : quality ratio guarantees an economical choice, yet without giving in on the looks.

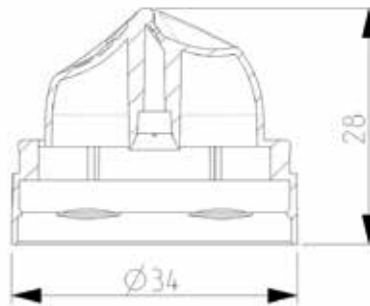

Environmental benefits were also one of the key features during the development. This lightweight product consists of just one material and is easy to recycle. And as this one-piece Cooper has an in-moulded spray nozzle and break-up unit, there is no need for a costly insert assembly line.

Integrated Spray Technology

Plasticum developed a proprietary spray solution with a patented technique, integrating both the actuator and insert. The spray orifice of the button is positioned just above the stem to optimise the control and performance when activating the aerosol. A special chamber and channel design stimulate the acceleration of particles into a swirling pattern.

with an over cap

dimensions

Unique Benefits

- One-piece
- Cost competitive
- Attractive and ergonomic design
- Different over caps possible
- Good functionality
- User-friendly
- Flexibility in flows, stem fits and colours
- Different spray patterns feasible
- Automatic assembly
- 100% final inspection
- Recyclable as one part

Specifications

- Diameter 34 mm
- Height 28 mm
- Fits on valve cup
- Applicable to tin plate and aluminium cans
- Designed for all common valve dimensions
- Gloss surface finish
- Appropriate for translucent and solid colours
- Suitable for Personal Care applications
- Supplied with an over cap
- Material PP
