Oscar

Best value spray cap in the market

Oscar

Best value spray cap in the market

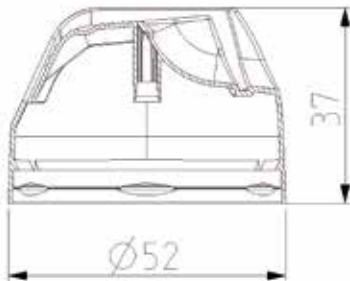

Oscar stands for 'cool' and 'sturdy'. This one-piece spray cap is a perfect cost-effective solution for several product applications and market segments. Plasticum's **Integrated Spray technology** ensures a maximum spray performance. Oscar is attractive in translucent as well as in solid colours. Its success has already been proven in the market.

The whole product is manufactured in one single moulding shot. No assembly or over cap is required. This also means that Oscar consists of just one material and that it can be recycled as one part, honouring the environment. The recessed actuator part protects against undesired actuation. The clearly marked push area has an embossed grip to complement the ergonomics.

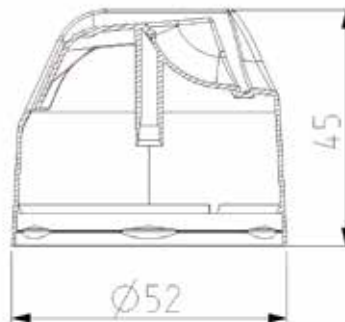

Oscar is offered in two different heights, depending on the preferences or specifications related to processability. The 37 mm version has a strong and sturdy presence. The 45 mm version has a cool yet elegant appearance.

Integrated Spray Technology

Plasticum developed a proprietary spray solution with a patented technique, integrating both the actuator and insert. The spray orifice of the button is positioned just above the stem to optimise the control and performance when activating the aerosol. A special chamber and channel design stimulate the acceleration of particles into a swirling pattern.

Oscar 52/37

Oscar 52/45

Unique Benefits

- One-piece
- Cost competitive
- Attractive and ergonomic design
- Good functionality
- User-friendly
- Flexibility in flows, stem fits and colours
- Different spray patterns feasible
- Recyclable as one part

Specifications

- Diameter 52 mm
- Two different heights: 37 mm and 45 mm
- Fits on necked-in tin plate cans and aluminium transfer cans
- Designed for all common valve dimensions
- Horizontal spray
- Matt surface finish
- Appropriate for translucent and solid colours
- Suitable for several product applications and market segments
- Material PP
