

# The Environmental Report

Living up to its mission of helping beauty brands perform, Quadpack is a global manufacturer and provider of packaging solutions. Aiming to have a positive impact on people and the planet, the group is committed to continuously improving the sustainability of its product portfolio.

The Environmental Report (ER) is an informative document that collects details of pack components and analyses their Life Cycle Assessment (LCA) data. The aim is to help customers choose their preferred combination relying on science-based information about the product's environmental footprint.

Quadpack uses PIQET's LCA tool to assess the environmental impacts and resource consumption of all packaging options. This data is then translated into our PIP rating system, which is a clear and transparent indicator of a product's sustainability level.

## ICONIC WOODACITY® LIPSTICK

Score		LCA		Input			Environmental indicators		Circularity		
PIP Rating	Product type	Item code PLS0011WDTY / PLS0015WDTY	Catalogue description	Material	Recycled content %	Renewable energy	Manufactured in EMEA	Water use volume (kL H2O) target 0	Carbon Footprint (kg CO2 eq) target 0	Circularity index target 1	Sustainable attributes
	INNER	CTF00010783	C-AL-12.7-IconicMech-Topfil-shiny silv	ALU/PP/PET/PS/PK	0%	Yes	Yes	0,0020	0,020	0,26	
	OUTER	CCA0170I014 / CCA0171I014	C-Wood 1846 IconicWoodacity_Cap + Base	Wood	0%	Yes	Yes	0,0004	0,010	0,00	
	OUTER REFILL	CCA0170I014 / CCA0171I014	C-Wood 1846 IconicWoodacity_Cap + Base Refill	Wood	0%	Yes	Yes	0,0002	0,005	0,49

Date: 18/04/2023

### Legend

#### Positive Impact Packaging rating

#### Sustainable attributes

### Definitions

**Climate change in CO2:** The result of global warming due to CO2 emissions released into the atmosphere as a result of the activities of a particular individual, organization, or community.

**Circularity:** Environmental systems that aim to eliminate waste and maximise the reuse of resources by creating a closed loop system.

**Water use volume:** The amount of water used in the production and supply of goods and services.

**Renewable energy:** Energy derived from natural resources that are replenished at a higher rate than they are consumed. Sunlight and wind, for example.
