

Hayes™ HP-2 & Hayes™ HP-3

Powerful // Practical

Looking for proven performance? Try our ready-to-use Hayes™ HP-2 and HP-3 hose end sprayers. Reliable, single-valve operation makes both ideal for larger lawn and garden applications. And since they're available in a range of mix ratio options, they're the smart, economical choice for a variety of formulas. The HP-2 features a simple on/off feed, which works well for insecticides, pesticides and fertilizers. The HP-3 has off/feed/water-wash options for rinsing and watering. It's also great for large-scale cleaning, like driveways and home siding.

Hayes™ HP-2 & Hayes™ HP-3
