

Aria® & Prelude®

Trusted // Timeless

Aria® and Prelude® raise the standards for cosmetic dispensers by providing consumers with a cleaner, more controlled experience. Both pumps feature superior dispensing, a standard lock for security, and our patented Pure Path™ technology which ensures sensitive formulas are protected by a metal-free fluid path. And, because these dispensers are produced globally, they offer brands greater supply chain ease and speed to market. Aria and Prelude truly defy convention to deliver outstanding results for skincare, liquid make-up and hair serum products.

Aria® & Prelude®

Exceed customer expectations for low-output dispensing

- Low force-to-actuate and robust pump engine for smooth delivery
- Hygienic, wipe-away head design (Aria) for a cleaner experience
- Locking feature for portability and security
- Metal-free Pure Path™ engine for better formula protection
- High compatibility with complex formulas including SPF, silicone, retinol, salicylic acid and others
- Hot stamping, metalization and other decoration or customization available
- Global supply chain allows for greater flexibility and speed to market
